

# **EXHIBIT 15**

**Sekrit** Today at 23:37

Hey @everyone, you sure have noticed the total hf proxy death. But don't worry, fiz and me have been working for a while now on our own solution which hopefully is up in a week. Nobody needs to panic, everyone who hosted a proxy will be able to host one again just like before with no real changes. Just trust the plan. <https://reentry.org/miniproxy>

However, we need to damage-control/bring them hope so people don't despair within that week. So could you please post to the thread right now that everything is fine, no need to despair, there is already work in motion? (Of course, everyone in this server will get full access but the other open proxies like cloudy will continue to exist too, same as every proxy owner keeping their own tokens they gave out to people for theirs. Just please, help /aicg/ out so we don't lose too many people, especially proxy-owners who would not just delete their accounts, let everyone know, post it everywhere so it reaches really everyone.)

Everything is fine, calm down, it is going to be even better than it is now!

**MINIPROXY**

Almost every proxy got banned. Calm down.  
TEMPORARY LINK: dead  
Edit: the coom shall flow. I found a way.  
cloudy will be back in less than a week. <3  
total active users: 100 (CLOSED)  
I don't have a tripcode  
I will check the emails and answer every single one of them.  
You can donate api keys f...

I just really don't want anyone to freak out now, it should have been finished already, we just need a few more days, that hf nuke just came at a really bad time...
